Column B

Biểu đồ

The histogram displays the frequency of data points across various intervals. The x-axis is labeled with values from 0.00 to 0.01 in increments of 0.001. The y-axis shows frequency from 0 to 200. The distribution is bimodal, with a primary peak around 0.008 and a secondary peak around 0.001.

```
freq = 100000
```

freq = 10000

freq = 100

nhận xét: với giá trị freq 1000000 thì giá trị offset lớn tuy nhiên khá ổn định, với freq 100000 thì offset bé và độ ổn định vẫn tốt, với các giá trị còn lại thì offset không còn tính ổn định
